**(54) Title:** A METHOD FOR ACCESSING AN ADDITIONAL CONTENT WITH PARENTAL CONTROL

**(57) Abstract:** The invention applies relates to the access to an additional content related to a main content from a player having an Internet access and being designed so as to allow the setting of parental levels. In a preferred embodiment the main content is stored on a disc edited with links toward the additional contents. When the disc is in place in the player, such a link can be established to access to the additional content. The invention applies when such an access is subject to a user identification. The invention consists in adding to the user identification process a step for recovering the parental level applicable to the user and adapting the offer made to the user depending on the recovered parental level.
